

Business Broadband

High speeds at a low price

Our high-speed business broadband gives you fast, reliable and cost-effective internet connectivity delivered anywhere throughout the UK. And with a range of phone package options it's really worth talking about.

You want a business broadband solution that will help your business go forward, not hold it back. You want to be able to download how much you like, not just how much your solution will let you. And you want everything to be as fast as possible. Well, we've been listening and built a business broadband solution that'll give you all that and more. It comes with no monthly restrictions, no hidden charges and is proven to be cost-effective and hassle-free.

Satisfying your needs

Broadband services are a fundamental need for every business, and the way you and your teams communicate is evolving at pace. Reliable connectivity, remote working and fast access to shared information is simply 'business as usual', so the availability of high-speed broadband is crucial.

Speed is of the essence

Business Broadband gives you cable speeds of up to 50Mbit/s, which means now you can act as fast as you think.

Business Broadband finds its voice

But it doesn't stop there. We've enhanced our service by creating simple broadband and phone bundles, offered at a competitive price – giving you the complete state-of-the-art package with standard voice tariffs.

Clever, smart and fast

Our Business Broadband is clever because it provides you with a Wireless Broadband connection at the touch of a button. It's smart because it's a single Virgin Media Business device, combining router, modem, wireless and a customised user interface. As for fast, we're talking about the fastest available business downstream speeds (50Mbit/s). What's more, we've also improved our upstream speeds significantly.

Pick your package

Different businesses have different needs, so we invested a lot of time and effort into developing a range of packages so you can choose the one that suits you best. Take a look at the chart for a more detailed breakdown of features, but meanwhile, here's a brief summary of what you get:

Business Broadband

This package offers you cable broadband (with our Super Hub gateway device) and ADSL broadband (with our ADSL2+ Hub gateway device), depending on your geographical location. Choose from either a LAN (Local Area Network) or a WLAN (Wireless Local Area Network) set-up – ideal for small offices and home worker connections.

Business Broadband and Phone

A plain and simple Broadband and Phone bundle, offered at a competitive price with standard voice tariffs. And it's available right across the country. Again, you have the option of a LAN or WLAN set-up, with the choice of enhanced care options too.

Business Broadband (Wires Only)

This simple ADSL broadband product allows you to control your installation and use your own NTE (Network Termination Equipment) or CPE (Customer Premises Equipment).

Whichever service you choose, our UK based dedicated Business Support Team is available 24/7 on our freephone 0800 number.

Benefits for your business

- **Unlimited service usage** – *no caps on usage, no monthly download limits, no extra charges.
- **Unrivalled service, with functionality and reliability** – 24-hour fix SLA cable broadband, installed by a qualified technician and business grade support. What's more, we fix most faults within 6 hours.
- **Easy-to-use product** – things work best when they are straightforward.
- **Flexible choices** – choose broadband with or without a phone line. Your call.
- **Transparent fixed-costs** – value for money, easy to budget and no nasty surprises.
- **No need to wait** – 50Mbit/s available via cable broadband now.
- **Fastest downloads in the country** – 50Mbit/s cable broadband is not limited by the distance from the exchange, so you'll always be up to speed.
- **Single national supplier** – one supplier, cable broadband and ADSL broadband coverage, easy to do business with – and just one bill.
- **More usable capacity at your disposal** – with business grade broadband, network controls are not applied during normal working hours.
- **Peace of mind** – knowing you're in safe hands for service and support.
- **Buying 'best in breed'** – getting the best available is always so reassuring.
- **Easy to buy** – it really is as easy as pie. Just get in touch.

*Unlimited usage is subject to our Fair Usage Policy.
