

IPVPN

DIGITAL SUPERHERO

IPVPN's built to work hard. It's ready for your SIP trunking, Hosted Unified Communications, data centre connections and hookups to the Cloud. It provides a quick, secure internet gateway to your big, buzzing hive of partners, plus national reach, baked-in security, heroic performance reserves and robust encryption. Just for starters.

IPVPN runs at up to 10Gbit/s across our £13bn fibre-optic network. We have a nationwide footprint, vast capacity, and end-to-end ownership – making it easier for us to provide end-to-end management without external dependencies or gaps. And with our own direct access connections there are no third parties or middlemen who might push service quality down and prices up.

We're flexible first-milers too, happy to hook you up with ADSL, Leased Line, Ethernet, FTTP and SOGEA. Support is quick and responsive because it comes from field teams near you – not just Head Office. Credentials like these enable us to write triple-measure SLAs to cover availability, performance and time-to-fix. And they're part of the reason organisations like Countrywide plc, Knight Frank, and South East Water choose to base their national operations on IPVPN from Virgin Media Business.

Here's what to expect...

- IPVPN done right: inherently secure with powerful end-to-end management
 - Up to the toughest jobs to carry your essential business apps across multiple channels without the need for individual PSTN lines
 - Triple-measure SLAs: not just availability, performance or time-to-fix, but all three
 - Huge national reach, abundant capacity, top-notch infrastructure, local field support
-

The feature summary below has all the numbers and options you'll want to know. And if there's something more you need, you'll find us happy to go the extra mile.

Who's it good for ?

Any organisation with a need to extend its ICT network across 5 or more fixed locations.

Feature summary

Managed IPVPN	
Configuration	Any-to-any; Hub and spoke; Hybrid; Overlapping VPN networking environments.
Access	Ethernet fibre up to 10Gbps; SOGEA up to 80/20Mbps; FTTP up to 1Gbps; HFC cable up to 500Mbps; 4G; Secure access from public internet.
Resilience	Active / Passive; Ethernet fibre up to 10Gbps; SOGEA up to 80/20Mbps; HFC cable; 4G; Microwave and dual supplier solutions available.
Availability	Available across the UK and internationally to over 170 countries via partner MPLS networks and field support organisations.
Security	Inherent MPLS security; 2-2-4 assured services and PSN IL3 Encryption service also available for the Public Sector.
Quality of Service	8 separate classes; 3 classes for ADSL and FTTC.
Managed service	Fully configured service; Remote monitoring; Proactive response; Comprehensive SLA; Online performance reporting.
