

BUSINESS PHONE LINES

Clear, reliable, ready for tomorrow

Traditional phone lines will be gone by around 2025 but think of it as a sort of butterfly effect: as one thing comes to an end, another exciting adventure begins. That's why we now offer a flexible, scalable digital service fit for the 21st century.

Our business phone lines, delivered over your broadband connection, offer an easy-to-manage digital voice environment for making and receiving calls. They use next-generation technology that's fit for the future and ready to offer all the latest voice features and connectivity services, today.

Why Virgin Media Business?

Future-proof

Choose a flexible, scalable digital service fit for the 21st century

Simple

Get all your voice and data services in one broadband package

Competitive

Save money with transparent, affordable tariffs and Voom Fibre bundles

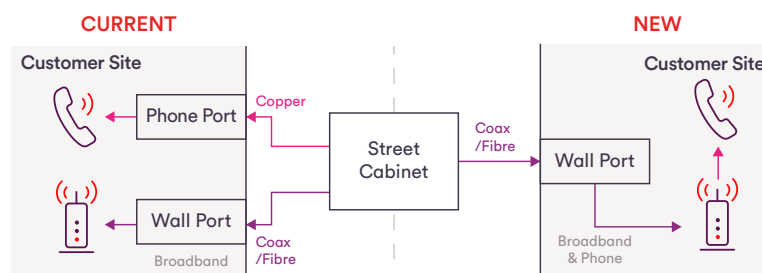

Hassle-free

Minimise downtime by keeping your existing number

The traditional vs. the new

We've relied on the legacy copper network to carry our calls for more than a century.¹ Now, our business phone lines are simplifying the way we communicate.

Give us a call and we'll help tailor the right business phone line for you: 0800 052 0800

What to expect with a business phone line over our broadband

- You'll need to keep your broadband router plugged in and switched on at all times to make and receive calls
- Remember that any connected apparatus won't work during a power or network outage
- If you or any of your employees are considered vulnerable or you have vulnerable people in your care, you can speak to us directly and we'll accommodate your needs
- If you don't have access to a mobile phone service and rely solely on the phone line to make calls to the emergency services, we can provide you with an appropriate solution
- If you have an alarm, lift, healthcare monitor or point-of-sale device that relies on a phone line, or you're thinking of buying apparatus that does, be sure to check with the device manufacturer to see if this service is suitable
