

Voom Fibre | Option 3+

For Self-Made Achievers. (And Early Friday Finishers.)

BUSINESS

MAKE THE WORLD YOUR WORKPLACE WITH VOOM FIBRE 3+

On-demand connectivity for the on-the-go business.

With a dedicated business landline, ultrafast broadband and 32GB of mobile data on a 4G network, you can communicate, collaborate and serve your customers even when you're on the move.

We don't believe the biggest networks should only be for big business. We also don't think the very best in connectivity has to mean the very highest prices. That's why we've provided affordable on-demand connectivity, so small businesses can do big things while on the move.

How does it work?

Voom Fibre 3+ combines our fastest broadband speeds with 32GB of mobile data on the UK's biggest 4G network – so you can stay connected and give your customers what they want, whether you're back at base or on the move.

Ideal for the data-dependent, Voom Fibre 3+ delivers 4G mobile network coverage across 98% of the UK, up to 350Mbps download speeds and up to 20Mbps upload speeds for when you're back at the office.

Why 4G Mobile SIM?

Collaborate on the move and unleash true connectivity with 32GB of mobile data on the UK's biggest 4G network from EE. Plus, with data-free messaging, data rollover, and Roam Like Home, you can take your data one step further – allowing you and your colleagues to work from the palm of your hand across the EU without paying more for your texts, data and minutes.

Why up to 350Mbps downloads?

With our fastest available broadband speeds, you can work far more effectively from the office, downloading large files when you need to, making the most of cloud services, and staying connected to your colleagues and customers in whatever way suits you best.

What you get

Dedicated landline

Unlimited calls

Download speed

Up to 350Mbps

Upload speed

Up to 20Mbps

Usage limit

Unlimited

Mobile data

32GB

Data-free messaging on Twitter, Facebook Messenger and WhatsApp¹

Contract length

24 months

Install cost

£50

IP address

Dynamic is offered as standard, with up to 5 static IPs

Wireless Hitron router⁵

Included

Voom Fibre | Option 3+

For Self-Made Achievers. (And Early Friday Finishers.)

Why up to 20Mbps uploads?

A 20Mbps upload speed lets you work without restriction, hosting websites effectively, sharing large files, uploading images to social media sites – whatever it is you need to do. You can also rely on cloud security software to protect all your data.

What else do you need to know?

- Make the world your workplace right away. Your 32G SIM will be delivered while we're setting up, so you can stay connected as you're waiting for your broadband to activate.
- Always be part of the conversation with a dedicated business landline, and unlimited calls³ from landline and mobile⁴ included as standard.
- Voom Fibre 3+ lets you add multiple static IP addresses so you can use on-site firewalls for extra protection or host your own email and web servers for complete control.
- Get preferential rates on business applications, including Microsoft 365.
- Every one of our customers – and all their colleagues – enjoy special offers from Virgin Media and other Virgin brands.

The powerful Hitron router

- DOCSIS/EuroDOCSIS 3.0 compliant
- WiFi Protected Setup (WPS) gives you a quick set-up of a secure wireless network
- 2.4GHz is great for long range but can suffer from interference
- 5GHz has a shorter range but is perfect for demanding activities like downloading large files
- 20/40MHz channel bandwidth
- Dimensions: 227mm (W) x 52mm (H) x 208mm (D)

Who's it good for?

Data and digitally-dependent businesses looking for complete connectivity. But especially sole traders, start-ups and skilled trades.

Voom Fibre | Option 3+

For Self-Made Achievers. (And Early Friday Finishers.)

Static or dynamic IP?

For browsing, using email and downloading files, you only need one IP address. It can even be one that changes every so often, a so-called 'dynamic IP'.

But if you're hosting a website or other web-based services, you need a static IP, one that doesn't change. It's how the world finds your location online. Get in touch and we'll help you select the right package to unleash the IP in your business. You may need more than one static IP address (hosting multiple servers each needing their own public IP address). We can offer a routed subnet (5 or 13 useable static IP addresses) for this purpose.⁵

Download versus upload

Upload speeds dictate how fast you send data from your location, into the Internet. Video conferencing, VoIP and backing up data to the cloud add to upload pressures of sending emails and web browsing. Our options – from 7Mbps to 20Mbps – equip most businesses very well.

But if you need more, take a look at our leased lines, which we call Managed Internet Access. This unlocks upload and download speeds that go all the way up to 1Gbps.

Why Virgin Media Business?

We're here to help you #VOOM. With a £13bn network – and an extra £3bn of ongoing investment – we've got the products and solutions to unleash your business. What's stopping you? Whether it's ultrafast broadband, a platform to promote your business, or a community of like-minded people, we can release your #VOOM.

Visit www.virginmediabusiness.co.uk/VF3Plus
for more options and to see how we can help your business #VOOM

Our business broadband speeds are advertised as 'up to' which means that whilst you should normally expect to receive the speeds as advertised, the actual speed you experience will be influenced by a number of factors and as a result it is possible that the speed you receive may be reduced. For further information relating to broadband speeds and the Voluntary Business Broadband Speeds Code of Practice that we have signed up to, please go to www.virginmediabusiness.co.uk/BBspeedcop. Virgin Fibre areas only.

1 Data-Free messaging on WhatsApp, Facebook Messenger and Twitter: Standard UK messaging (video, picture, audio, plus tweets and Twitter DMs). 2 Roam like Home is subject to a fair usage policy. 3 Plans include UK calls to UK landlines (01, 02, 03) & UK mobile networks. Jersey, Guernsey and Isle of Man mobiles excluded. UK texts and data only. Fair Use policy applies. 4 Unlimited mobile and landline calls to UK local, regional, national, mobile and selected international destinations, included as standard with Voom Fibre broadband and phone bundles (landline calls unmetered for the first 60 minutes and UK mobiles for the first 10 minutes). 5 You will require your own LAN router/firewall for routed subnet.
